Broker Infrastructure Engineer | MT5 Administration | Liquidity Routing

Trading Systems | Prop Firm Operations

PROFESSIONAL SUMMARY

Broker Infrastructure Systems Engineer and Developer with practical experience **in building and supporting broker-side trading systems, prop firm operations, automation tools**, and financial infrastructure solutions. **Skilled in MT5 Manager/Admin, bridge integrations**, liquidity routing, execution monitoring, and **CRM** operations across **Centroid, FXCubic, and TFB** infrastructure. Developed tools for toxic trading detection, swap configuration, and real-time risk monitoring that helped streamline operations and improve execution efficiency.

TECHNICAL SKILLS

- **Trading Platforms:** MT5 Manager, MT5 Administrator, Match-Trader, TradeLocker
- **Bridge & Liquidity Infrastructure:** Centroid Bridge, FXCubic, Brokeree, TFB Trade Processor, TFB Tools
- **Broker Operations:** Liquidity Routing, Execution Monitoring, Risk Monitoring, Symbol & Group Management
- **CRM & Back Office Systems:** Techysquad, Brocktagone, Fynxt
- **Automation & Development:** Operational Tooling, Trading Analytics, Reporting Systems, Dashboard Development
- **Brokerage Infrastructure:** MT5 Administration, Prop Firm Operations, Broker Back Office Operations, Account Management, Trading Operations

PROFESSIONAL EXPERIENCE

Brokerage Technology Firm | Broker Infrastructure Engineer | Aug 2025 – Present

- Administer MT5 trading infrastructure and broker-side operations.
- Manage Centroid, FXCubic, and TFB bridge integrations for liquidity routing and execution monitoring.
- Support Match-Trader, TradeLocker, and CRM platforms across brokerage and prop-firm environments.
- Develop automation tools, risk monitoring systems, and operational dashboards.
- Configure trading conditions, account controls, and back-office workflows.

ITpreneur Edutech | Java Intern | Dec 2024 – Mar 2025

- Worked with Java concepts and gained practical exposure to software development fundamentals.
- Developed debugging, problem-solving, and application development skills through hands-on training.

Cyber Success | Java Full Stack Intern | Feb 2025

- Completed Full Stack Java training covering Java, SQL, HTML, CSS, and backend development.
- Built practical understanding of web application development, database concepts, and software engineering practices.

KEY PROJECTS

Broker Infrastructure Monitoring Tools

MT5 Flow Analyzer & Toxic Trading Detection System

- **Built** a full-stack **MT5 trade flow analysis platform** detecting **scalping**, **VPS usage**, **burst trading**, **grid**, **martingale**, and **reversal** strategies.
- Implemented toxic trading scoring, execution IP tracking, geolocation analysis, batch account scanning, and Excel report generation for broker risk monitoring.

MT5 Swap & Symbol Management Tool

- Developed an **MT5 based web application for live swap management**, batch symbol updates, Excel-driven processing, validation checks, and audit logging.

Brokerage Report & Operations Automation Tools

- Developed **brokerage calculation and operational reporting tools** that **reduced manual processing time** and improved back-office workflow efficiency.

MT5 Management Platform

- **Built an MT5 manager control platform** with account management, balance/credit operations, leverage controls, trading permissions, and account forensic analysis.
- Added trading behavior detection, execution IP investigation, VPS identification, performance analytics, and exportable batch reporting tools.

Broker Infrastructure Monitoring Tools

- **Configured and monitored** Centroid Bridge for liquidity routing and execution tracking. Managed bridge integrations (**Centroid**, **FXCubic**, **TFB Trade Processor**) alongside CRM platforms (**Techysquad**, **Brocktagone**, **Fynxt**, **Brokeree**) for broker back-office operations.
